

GRADES K-5

# Learn to Snowboard (Grades K-3)

This beginner-friendly "Learn to Snowboard" field trip is specially designed for students up to 3rd grade. Through an interactive, hands-on course, students will gradually learn basic snowboarding stance and movement on snowy terrain. With a focus on balance, confidence, and play, this exciting experience introduces young riders to the joys of snowboarding in a safe, supportive environment—no hills required!

**Length:** 1 - 2 hour  
**Season:** Winter  
**Required Activity:** Snowboarding (novice)  
**Location:** Mt. Rose  
**Applicable Standard:** NVPES 3.2.2

# Ski/Snowboard Lesson (Grades K-5)

Hit the slopes and learn to ski or snowboard! Whether students are first-timers or already carving turns, this field trip offers something for everyone. With professional instructors, students can choose to learn the basics of skiing or snowboarding or build on their existing skills in a safe, supportive environment. Students will learn how to glide and stop and explore beginner run in a fun day of physical literacy and mountain adventure!

**Length: 2 hours**

**Season: Winter**

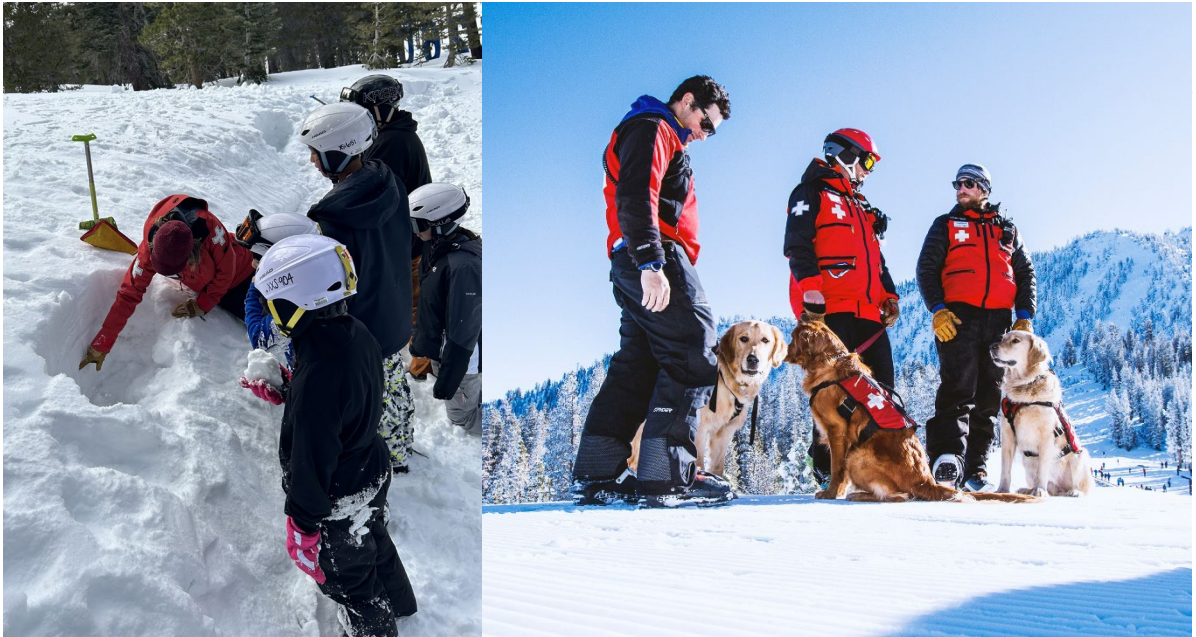

**Required Activity: Skiing and/or Snowboarding**

**Location: Mt. Rose**

**Applicable Standard: NVPES 3.2.2, 3.5.2**

# Snow Science & Safety Lessons with Ski Patrol

(Grades K-5)

Join the Mt. Rose ski patrol for a hands-on field trip to learn how they keep the mountain safe! Elementary students will explore mountain weather and forecasting, practice using radios for communication, and discover how patrol teams prepare for avalanches. Students will also learn how to examine snowpack layers and understand what makes snow safe or dangerous. It's a fun and educational adventure into the world of mountain safety and science!

**Length:** 2 hours

**Season:** Winter

**Required activity:** Hiking/Snowshoeing

**Location:** Mt. Rose

**Applicable Standard:**

- NVPES 3.2.2, 3.5.2
- Science Standards according to age

# Sustainability and Mountain Science (Grades 2-5)

Explore sustainability in action! These hands-on field trips introduce students to the following environmental topics, all in the context of Mt. Rose:

- Mountain Ecosystems
- Trees & Forest Evolution
- Natural Resources
- Energy & Matter in the Forest
- Water Resource Management

Students will discover how mountain ecosystems change over time, learn where our resources come from, and see how our ski resort operates sustainably, all while connecting with nature and having fun outdoors.

**Length: 2 hours**

**Season: Winter**

**Required Activity: Hike/Snowshoe**

**Location: Mt. Rose**

**Applicable Standards:**

- NVPES 3.2.2, 3.5.2
- Science standards according to grade

# Wildslide Snow Tubing (Grades K-5)

Get ready for nonstop winter fun on the mountain! This field trip takes students to the Wildslide tubing hill at Mt. Rose, where they'll zoom down snowy lanes in inflatable tubes, no experience necessary. With a magic **carpet ride back to the top, it's easy for everyone to join the fun.** **Perfect for all ages, this exciting adventure offers a safe and thrilling way to enjoy the snow and unforgettable moments with friends!**

**Length:** 1-3 hours  
**Season:** Winter  
**Required Activity:**  
**Location:** Mt. Rose

# Custom Program

---

Looking for a unique and educational mountain experience? We offer custom field trips at Mt. Rose Ski Tahoe for any grade level, designed to align with Nevada educational standards. Whether your focus is on the ski industry, snow and water science, local ecology, snowshoeing, skiing, or snowboarding, we'll work with you to build a hands-on, engaging program that fits your curriculum.

In addition to standards-based trips, we're also happy to dive deeper into topics that spark student curiosity, even if they don't directly tie to classroom requirements. And if a visit to the mountain isn't possible, we can adapt many of our programs to bring the mountain experience directly to your classroom.
